How to get the coordinates of Hyperlink in UIWebview

up vote 0 down vote favorite	I'm loading the pdf (Having multiple Hyperlinks) document in UIWebview. I have to show UIPopover over hyperlinks dynamically.
	I'm able to capture the coordinates of hyperlink using TapGesture Action method
	-
	(void)tapAction:(UITapGestureRecognizer *)sender
	{
	    self.point = [sender locationInView:self.myWebView];
	}
	
	And presenting the UIPopover over hyperlink by using below method
	- (BOOL)webView:(UIWebView *)webView shouldStartLoadWithRequest:(NSURLRequest *)request navigationType:(UIWebViewNavigationType)navigationType
	{
	    NSURL *rqstUrl = [request URL];
	    if (([[rqstUrl scheme] isEqualToString: @"https"] || [[rqstUrl scheme] isEqualToString: @"http"]) && (navigationType == UIWebViewNavigationTypeLinkClicked))
	    {
	        [self.myWebView stopLoading];
	        CGRect rect = CGRectMake(self.point.x,self.point.y-5, 5, 5);

```
        UIPopoverController
*popController =
[[UIPopoverController alloc]
initWithContentViewController:cont
entViewController];

popController.popoverContentSize =
CGSizeMake(500, 200);
        self.popController =
popController;

self.popController.delegate =self;
        UIPopoverArrowDirection
direction =
UIPopoverArrowDirectionUp|UIPopove
rArrowDirectionDown;

self.popController.popoverLayoutMa
rgins = UIEdgeInsetsMake(0,
rect.origin.x, 1, 1);
        [self.popController
presentPopoverFromRect:rect
inView:webView
permittedArrowDirections:direction
animated:YES];
    }
    return YES;
}
```

But the problem is if I tapped in two different locations within 1 or 2 seconds like First Tap is **On Hyperlink** and Second Tap is on "somewhere else in UIWebview", UIPopover is presenting at second tap location only not in hyperlink location. I have to show UIPopover based on the Hyperlink position only, not in other location.How can I resolve this issue?

objective-c xcode uiwebview uipopovercontroller uitapgesturerecognizer
